

SUMMARY	
This month Anshika worked across biology and ICT topics. In biology she covered inheritance, biological molecules, enzymes, photosynthesis, human nutrition and digestion, and practised experimental write-ups and exam-style questions. In ICT she continued spreadsheet practicals and covered system design, validation and early microcontroller concepts. Overall she engaged actively by asking clarifying questions, attempting past-paper practice, and following teachers' instructions during experiments and tests.	
TOPICS COVERED	
In ICT the focus was on spreadsheet practicals and functions (including lookup and conditional tools), data validation, system lifecycle and system design concepts, and an introduction to microprocessor/microcontroller-controlled systems. Biology work included inheritance (test crosses, monohybrid/dihybrid crosses and selective breeding), structure and function of biological molecules (carbohydrates, lipids, proteins, DNA), enzymes (mechanisms, temperature and pH effects, and practicals such as amylase/starch tests), photosynthesis and leaf experiments, and human nutrition and digestion (vitamins, enzymes, absorption, villi and digestive organs).	
PROGRESS & STRENGTHS	
Shambhavi noted that Anshika “performed well” on the biological molecules work and that she showed a good understanding of enzyme concepts during practice questions. Anshika has been proactive in class: she asks for figures or resources when needed, follows experiment procedures (for photosynthesis and enzyme practicals), and completes spreadsheet tasks and practical exercises in ICT. Teachers also observed that she can apply concepts to past-paper style questions and practical write-ups.	
AREAS FOR GROWTH	
Anshika had difficulty recalling some vitamin names and corresponding deficiency diseases during revision and would benefit from focused review of the vitamin–deficiency pairs. There were a few accuracy issues in genetics and test review (missing detail about the male parent chromosomes and a couple of incorrect answers around ribosomes versus DNA) that suggest targeted practice on genetic diagrams and terminology would help. Strengthening precise recall (names, single-word answers) for nutrition and genetics will improve her exam readiness.	
NEXT STEPS	
You might encourage continued practice on the vitamin table and deficiency conditions and short, timed recall drills for those pairs. Support Anshika with a few focused genetics exercises that require drawing gametes and labelling parent genotypes to build accuracy. Reinforcing enzyme conditions and the practical write-up format used in photosynthesis and amylase experiments will help consolidate understanding. For ICT, brief, hands-on practice with lookup functions, validation checks and simple data-cleaning tasks will keep her spreadsheet skills sharp.	
SESSIONS CONDUCTED	
May 5	Live Session-UnboundYou HOSTED BY SHAMBHAVI CHAUDHARY Tue 05:02 PM • 0 credits EndedNo Show
May 7	Excel Mastery and Career Insights HOSTED BY DIVYANSHU RAJ Thu 08:32 PM • 1 credit EndedCompleted
May 8	Genetics Mastery: Inheritance Insights HOSTED BY SHAMBHAVI CHAUDHARY Fri 05:06 PM • 1 credit EndedCompleted
May 9	Mastering Excel for Professionals HOSTED BY DIVYANSHU RAJ Sat 11:31 AM • 1 credit EndedCompleted
May 10	Practical Excel Mastery Session HOSTED BY DIVYANSHU RAJ Sun 11:29 AM • 1 credit EndedCompleted
May 12	Exploring Biological Molecules Together HOSTED BY SHAMBHAVI CHAUDHARY Tue 05:10 PM • 1 credit EndedCompleted
May 15	Understanding Enzymes and Catalysts HOSTED BY SHAMBHAVI CHAUDHARY Fri 05:00 PM • 1 credit EndedCompleted
May 16	Excel and Microprocessor Insights HOSTED BY DIVYANSHU RAJ Sat 11:29 AM • 1 credit EndedCompleted
May 17	Innovations in Transport Safety Systems HOSTED BY DIVYANSHU RAJ Sun 11:33 AM • 1 credit EndedCompleted
May 19	Photosynthesis and Plant Physiology HOSTED BY SHAMBHAVI CHAUDHARY Tue 05:02 PM • 1 credit EndedCompleted
May 22	Photosynthesis Factors and Structures HOSTED BY SHAMBHAVI CHAUDHARY Fri 05:00 PM • 1 credit EndedCompleted
May 23	ICT Systems Lifecycle Insights HOSTED BY DIVYANSHU RAJ Sat 11:44 AM • 1 credit EndedCompleted
May 24	Mastering Validation in Software HOSTED BY DIVYANSHU RAJ Sun 11:25 AM • 1 credit EndedCompleted
May 28	Nutrition and Digestion Essentials HOSTED BY SHAMBHAVI CHAUDHARY Thu 05:31 PM • 1 credit EndedCompleted
May 30	Mastering ICT Documentation Fundamentals HOSTED BY DIVYANSHU RAJ Sat 11:34 AM • 1 credit EndedCompleted
May 30	Mastering Nutrition and Digestion HOSTED BY SHAMBHAVI CHAUDHARY Sat 05:02 PM • 1 credit EndedCompleted
May 31	Navigating Internet Fundamentals HOSTED BY DIVYANSHU RAJ Sun 11:26 AM • 1 credit EndedCompleted
